

## Certificate in Oral Health Education, National Exam Board for Dental Nurses (NEBDN)

### Overview:

Oral Health Education is concerned with influencing an individual's, or on a broader scale, a community's behavioural pattern, to maintain a mouth free from disease. Oral health is an essential component of overall health and as such is of vital importance in maintaining one's well being. Achieving this qualification will enable dental care professionals to include oral health as part of their role. It will enhance the practice profile by demonstrating commitment towards patient care via the prevention of oral disease.

### Objectives:

To further the skills and knowledge necessary for the effective instruction and education of patients in oral health. This programme reflects the newly revised National Exam Board Certificate in Oral Health Education.

### Who should attend:

Qualified Dental Nurses interested in oral health and committed to patient care.

### Duration:

1 year – evening class

### Outline:

- The dentition
- Causes and prevention of oral disease
- Behavioural science
- Setting up an exhibition
