

Administration of Controlled Drugs

Aims and Objectives:

To provide senior care workers with the knowledge and skills to check controlled drugs during administration

Learning Outcomes:

On successful completion of the course the candidate will be able to:

- Access local / organisational policy for ordering and storing controlled medication in the workplace
- Identify the legislation with regard to the ordering, storage and disposal of controlled medicines
- Identify the correct mode of storage for controlled medicines
- Discuss the range of controlled drugs and the action on individuals
- Assist in the administration of a controlled drug along with a Registered practitioner
- Identify some side effects of the more common controlled drugs

Target group:

Health Care workers who are involved in checking Controlled Drugs

Duration:

One day
