

Administration of Medicines

Aims and Objectives:

To raise the awareness of care home staff to the regulatory and good practice guidelines in the administration of medicines

Learning Outcomes:

Following this study day, the health care worker will:

- Be aware of legislation and local policies
- Have an understanding of the classification and types of medication in use
- Be able to list the methods of administration of medication
- Know how medicines are prescribed, received and stored within the home
- Be aware of the correct procedure for administering medicines and adverse reactions that might occur

Target Group:

Support workers within the care home environment

Duration:

One day
