

End of Life Care

Aims and Objectives:

To introduce or enhance the knowledge and skills of carers to enable them to support residents and their families at end of life

Learning Outcomes:

Following this study day, the health care worker will:

- Have increased their knowledge of managing physical symptoms such as pain, sickness and skin breakdown
- Be in a position to offer emotional support to the resident and their family
- Have an awareness of practical matters such as advice on settling affairs
- Have explored thoughts about dying and what happens after death

Target group:

Health and Social Care workers who care for individuals at the end of life

Duration:

One day
