

Infection Control

Aims and Objective:

To have the health care worker practice in a safe manner in relation to infection control

Learning Outcomes:

Following this study day, the health care worker will:

- Be aware of the common infections within health care settings
- Have a knowledge of how infection spreads
- Know how to break the chain of infection within the care environment
- Have had practice of washing hands correctly
- Have considered the care of the service users with invasive equipment for example catheters, subcutaneous infusions.

Target group:

Health and Social Care workers from all environments

Duration:

One day
