

Introduction to Dementia

Aims and Objective:

To provide the health care worker with an understanding of Dementia and the knowledge and skills to appropriately care for the client with Dementia

Learning Outcomes:

Following this study day, the health care worker will:

- Be able to list the types of Dementia
- Know how the diagnosis is made
- Have a knowledge of the effects on the service user
- Have considered the challenges that the effects of the illness poses on care in general
- Have begun to consider strategies to deal with these challenges

Target group:

Health and Social Care workers who wish to develop their understanding of Dementia

Duration:

One day
