

# Introduction to some Common Medical Conditions

## **Aims and Objectives:**

To increase the knowledge and understanding of the care worker in relation to 3 common medical conditions

## **Learning Outcomes:**

Following this study day the health care worker will:

- Have an introductory knowledge of Parkinson's Disease, Epilepsy and Stroke
- Be aware of the effects on the resident suffering from any of the above conditions
- Have an improved understanding of the care necessary for the resident who suffers from any of the above conditions

## **Target Group:**

Support workers who care for service users with the above conditions

## **Duration:**

Half day
