

Understanding and Managing Epilepsy

Aims and Objectives:

To dispel the myths surrounding epilepsy and provide participants with basic facts about the condition and its management

Learning Outcomes:

Following this study day, the health care worker will:

- Be able to define epilepsy and understand the causes
- Know the types of seizures and the triggers and phases of these
- Be aware of treatments for epilepsy
- Be able to demonstrate the first aid treatment for seizure types and other health and safety considerations
- Have a knowledge of useful organisations for those individuals with epilepsy

Target Group:

Individuals working in a care setting

Duration:

Four hours
